Baixarmalcolmsdublado Pull0 You are here. About the Author Kewk Kewk is a writer, editor and producer. She is currently based in London.Q: How do I sort an integer array using predefined order I have the following array which is the order of importance for all the fruits I want to sort. I have written a code, where I just wanted to iterate through the array and check whether the value of a element is equal to 0 and if so, replace it with 1. Then I want to print the sorted array. How can I do it? import java.util.*; public class Sort{ public static void main(String[]args){ String[] fruits = {"1", "2", "3", "4", "5"}; System.out.println("Before sort"); printArray(fruits); sort(fruits); System.out.println("After sort"); 82157476af
