Also it can run PALETTE Stealer for you. The advantage of this tool over other Directdraw/Direct3D compatibles that fullscreen their windowed game is that it has its own windowed layer, which can be the same with your game's window. If you are using a directdraw game, this is the best way to play it, since all the other tools have some problems with that. You can customize the window style, windows colors, transparency and even the game button. Also you can set the transparency of the launcher and the game fullscreen layer. It's also possible to resize your window and move it. You can also use this to run your game directly (without the fullscreen layer). The game will open in a new window, and you can also use it for test purpose. The reason why you shouldn't run the game in fullscreen is that your window will stay black (and the game doesn't support a non-black fullscreen layer). It's also possible to combine it with W9x/2K/2K3 compatibility mode by changing your system variables to directdraw9 and 2K3. This way you can play in fullscreen with Windows 2k3 while retaining the option to use directdraw for older games. Click to expand... Application CLSets CL Sets is a powerful and easy to use tool to create your own sets of Windows files and registry entries. Using this program you can easily remove programs you don't need, fix display problems or change the Windows appearance for your needs. The program allows you to set the visual style, transparency and transparency of all your windows. With this you can choose which visual styles you like the most, and also create shortcuts to run specific programs when you are using a specific style. You can also create a set that will set your display settings for every programs. You can even create sets that will change the colors of the windows or the system, making your desktop look different every time you start your computer. All the sets are saved in a simple text file that you can edit if you need. You can also create user specific sets that will have different settings for your own needs. You can create your own sets for any purpose you like, and use them for your needs or save them to use them at a later time. If you have troubles with your display settings, or you don't know how to 82157476af
